

Euro Style Gutter

The half round gutter is a very old profile, having been around since the first formed metal gutter. Typical to homes throughout Europe, this design lends well to heritage and upscale homes where the designer strives for a certain elegance.

Unlike continuous formed gutter, this product is made in 8 ft. sections and fitted to the home with heavy brackets. The brackets can be from simple to exquisite in shape, custom made for a unique look. Very popular in Copper and Zinc, but also available in aluminum, painted to order.
